# MT 600 Commodity Trade Confirmation

## MT 600 Scope

This message type is exchanged by or on behalf of the institutions or corporates, party A and party B, which have agreed to a commodity trade. This message is also used when one of the trading parties is a fund manager.

It is used to confirm the details of:

- a new contract between the parties
- an amendment to a previously agreed contract
- the cancellation of a contract
- the settlement of a commodity option which has been exercised.

This message may also be exchanged to confirm the liquidation of a forward deal.

In some cases, only one of the financial institutions involved in a contract will send a confirmation to the second financial institution. These cases include:

- retransmission due to errors in a previously sent confirmation
- additional information about a previously confirmed contract, (for example, to provide the name of the party in field 57a and/or 87a, in those cases where the previous confirmation contained the code UNKNOWN).

It may also be used to report the details of a contract to a trade repository.

## MT 600 Format Specifications

The format contains four sequences:

- Sequence A Details of the Contract provides the details of the commodity contract.
- Sequence B Commodity Bought provides the settlement information in those cases where the Sender has bought the commodity.
- Sequence C Commodity Sold provides the settlement information in those cases where the Sender has sold the commodity.
- Sequence D Reporting Information provides transaction information that must be reported to a trade repository. This sequence is optional and is only to be used for reporting to trade repositories, although some fields, for example, unique transaction identifier and prior unique transaction identifier, might be used on regular confirmations.

## MT 600 Usage Rules

- Changes to the quantity of commodity, and/or price per unit, and/or consideration and/or settlement instructions require another confirmation.
- This message handles only the contract part of a commodity trade.

The actual transfer/delivery of commodity is handled through the MT 604 Commodity Transfer/Delivery Order and the confirmation of debits or credits is handled through the MT 606 Commodity Debit Advice/MT 607 Commodity Credit Advice/MT 608 Statement of a Commodity Account. In all cases, the common reference of the MT 600 must be quoted in the relevant reference field (that is, field 21 of the MT 604/606/607 or field 61, subfield 7 of the MT 608).

The actual transfer of funds (that is, the consideration) is handled through the financial institution transfer messages (MT 202/203/205) and the confirmation of debits or credits is handled through the MT 900/910/950. In all cases, the common reference of the MT 600 must be quoted in the relevant reference field (that is, field 21 of the MT 202/203/205/910 or field 61, subfield 7 of the MT 950).

## Industry Requirements

- If field 77H specifies ISDA as the type of master agreement, the 1998 FX and Currency Option Definitions (the FX definitions, as published by the International Swaps and Derivatives Association, Inc., the Emerging Markets Traders Association and The Foreign Exchange Committee) as amended and supplemented from time to time are incorporated into this confirmation unless field 14C states another version of the above mentioned FX definitions.
- [If field 77H specifies ISDA as the type of master agreement and Party A and Party B are parties to an ISDA Master Agreement or an Interest Rate and Currency Exchange Agreement \(each an Agreement\), this Confirmation constitutes a Confirmation as referred to in, and supplements, forms a part of, and is subject to that Agreement.](#)

[If Party A and Party B have not entered into any ISDA Master Agreement or other master agreement, Party A and Party B agree to use all reasonable efforts to promptly negotiate, execute, and deliver an agreement in the form of a 2002 ISDA Master Agreement \(the "ISDA Form"\), with such modifications as Party A and Party B will in good faith agree. Upon the execution by Party A and Party B of such an agreement, this Confirmation will supplement, form part of, and be subject to that agreement. All provisions contained or incorporated by reference](#)

[in that agreement upon its execution will govern this Confirmation.](#)

- ~~If field 77H specifies ISDA as the type of master agreement and Party A and Party B are parties to an ISDA Master Agreement or an Interest Rate and Currency Exchange Agreement (each an Agreement), this Confirmation constitutes a Confirmation as referred to in, and supplements, forms a part of, and is subject to that Agreement.~~
- ~~If Party A and Party B are not parties to an agreement, this Confirmation evidences a complete and binding agreement between Party A and Party B as to the terms of the Transaction to which this Confirmation relates. Party A and Party B agree to use all reasonable efforts promptly to negotiate, execute, and deliver an agreement in the form of a 2002 ISDA Master Agreement (Multicurrency Cross Border) (the "ISDA Form"), with such modifications as Party A and Party B will in good faith agree. Upon the execution by Party A and Party B of such an agreement, this Confirmation will supplement, form part of, and be subject to that agreement. All provisions contained or incorporated by reference in that agreement upon its execution will govern this Confirmation except as expressly modified below. Until Party A and Party B execute and deliver that agreement, this Confirmation, together with all other documents referring to the ISDA Form (each a "Confirmation") confirming transactions (each a "Transaction") entered into between Party A and Party B (notwithstanding anything to the contrary in a Confirmation) shall supplement, form a part of, and be subject to an agreement in the form of the ISDA Form as if Party and Party B had executed that agreement in such form (but without any Schedule thereto except for the election of English Law as the governing law, EUR as Termination Currency and Automatic Early Termination not applicable to Party A and Party B, provided, however, that where the Event of Default specified in Sections 5(a)(vii)(1), (3), (4), (5), (6) of the ISDA Form or, to the extent analogous thereto, Section 5(a)(vii)(8) of the ISDA Form is governed by a system of law which does not permit termination to take place after the occurrence of the relevant Event of Default, then the Automatic Early Termination provision of Section 6(a) of the ISDA Form shall apply to the Defaulting Party) on the Trade Date of the first such Transaction between us. In the event of any inconsistency between the provisions of that agreement and this Confirmation, this Confirmation will prevail for the purpose of this Transaction.~~
- If some of the standard definitions linked to the agreement specified in field 77H do not apply to the confirmation of a trade under that agreement, a long form confirmation must be sent.

8a/4!a2!c4!n4!a2!c (Code)(Common Reference)

### PRESENCE

Mandatory in mandatory sequence A

### DEFINITION

This field identifies the function of the message and contains a reference of the contract common to both the Sender and Receiver.

### NETWORK VALIDATED RULES

Common Reference consists of two codes, a Sender's code and a Receiver's code, separated by a four-digit number.

The codes are made up from the party prefix and party suffix of the Sender's and Receiver's BICs, that is, their BIC without the country code (Error code(s): T95). These codes must appear in alphabetical order, with letters taking precedence over numbers (Error code(s): T96).

The four-digit number must consist of the rightmost non-zero digit of field 33G in sequence A, preceded by the three digits to the left of it. If there are no digits to the left of it, the space must be zero filled (Error code(s): T22).

## 5. Field 94A: Scope of Operation

### FORMAT

Option A	4!c	(Scope)

# MT 601 Commodity Option Confirmation

## MT 601 Scope

This message type is exchanged by or on behalf of the institutions or corporates, party A and party B, which have agreed to a commodity option contract. This message is also used when one of the parties is a fund manager.

It is used to confirm the details of

- a new contract between the parties
- an amendment to a previously agreed contract
- the cancellation of a contract
- the surrender of an option by the buyer (holder) to the seller (grantor) for compensation.

In some cases, only one of the financial institutions involved in a contract will send a confirmation to the second financial institution. These cases include:

- retransmission due to errors in a previously sent confirmation
- additional information about a previously confirmed contract.

It may also be used to report the details of a contract to a trade repository.

## MT 601 Format Specifications

The format contains two sequences:

- Sequence A General Information provides the details of the option confirmation.
- Sequence B Reporting Information provides transaction information that must be reported to a trade repository. This sequence is optional and is only to be used for reporting to trade repositories, although some fields, for example, unique transaction identifier and prior unique transaction identifier, might be used on regular confirmations.

## MT 601 Usage Rules

- Changes to the quantity of the commodity, and/or strike price, and/or premium price, and/or exercise date, and/or settlement instructions require another confirmation.
- This message type handles only the contract part of the commodity option.
- In those cases where the message is exchanged to confirm a new contract, or an amendment, cancellation or close out of a previously agreed contract, the content of the confirmations should be identical, and is used to confirm information already known to the two parties. Careful verification of the exchanged messages is, of course, required.
- A commodity option may be exercised by the buyer. To confirm the settlement of the exercise of a commodity option, an MT 600 Commodity Trade Confirmation may be used, with the function code EXOPTION in field 22 and field 21 containing the TRN of the related MT 601.

## Industry Requirements

- If field 77H specifies ISDA as the type of master agreement, the 1998 FX and Currency Option Definitions (the FX definitions, as published by the International Swaps and Derivatives Association, Inc., the Emerging Markets Traders Association and The Foreign Exchange Committee) as amended and supplemented from time to time are incorporated into this confirmation unless field 14C states another version of the above mentioned FX definitions.
- [If field 77H specifies ISDA as the type of master agreement and Party A and Party B are parties to an ISDA Master Agreement or an Interest Rate and Currency Exchange Agreement \(each an Agreement\), this Confirmation constitutes a Confirmation as referred to in, and supplements, forms a part of, and is subject to that Agreement.](#)

[If Party A and Party B have not entered into any ISDA Master Agreement or other master agreement, Party A and Party B agree to use all reasonable efforts to promptly negotiate, execute, and deliver an agreement in the form of a 2002 ISDA Master Agreement \(the "ISDA Form"\), with such modifications as Party A and Party B will in good faith agree. Upon the execution by Party A and Party B of such an agreement, this Confirmation will supplement, form part of, and be subject to that agreement. All provisions contained or incorporated by reference in that agreement upon its execution will govern this Confirmation.](#)

- ~~If field 77H specifies ISDA as the type of master agreement and Party A and Party B are parties to an ISDA Master Agreement or an Interest Rate and Currency Exchange Agreement (each an Agreement), this Confirmation constitutes a Confirmation as referred to in, and supplements, forms a part of, and is subject to that Agreement.~~
- ~~If Party A and Party B are not parties to an agreement, this Confirmation evidences a complete and binding agreement between Party A and Party B as to the terms of the Transaction to which this Confirmation relates. Party A and Party B agree to use all reasonable efforts promptly to negotiate, execute, and deliver an agreement in the form of a 2002 ISDA Master Agreement (Multicurrency Cross Border) (the "ISDA Form"), with such modifications as Party A and Party B will in good faith agree. Upon the execution by Party A and Party B of such an agreement, this Confirmation will supplement, form part of, and be subject to that agreement. All provisions contained or incorporated by reference in that agreement upon its execution will govern this Confirmation except as expressly modified below. Until Party A and Party B execute and deliver that agreement, this Confirmation, together with all other documents referring to the ISDA Form (each a "Confirmation") confirming transactions (each a "Transaction") entered into between Party A and Party B (notwithstanding anything to the contrary in a Confirmation) shall supplement, form a part of, and be subject to an agreement in the form of the ISDA Form as if Party A and Party B had executed that agreement in such form (but without any Schedule thereto except for the election of English Law as the governing law, EUR as Termination Currency and Automatic Early Termination not applicable to Party A and Party B, provided, however, that where the Event of Default specified in Sections 5(a)(vii)(1), (3), (4), (5), (6) of the ISDA Form or, to the extent analogous thereto, Section 5(a)(vii)(8) of the ISDA Form is governed by a system of law which does not permit termination to take place after the occurrence of the relevant Event of Default, then the Automatic Early Termination provision of Section 6(a) of the ISDA Form shall apply to the Defaulting Party) on the Trade Date of the first such Transaction between us. In the event of any inconsistency between the provisions of that agreement and this Confirmation, this Confirmation will prevail for the purpose of this Transaction.~~
- If some of the standard definitions linked to the agreement specified in field 77H do not apply to the confirmation of a trade under that agreement, a long form confirmation must be sent.
